

# Git, GitHub and Markdown in a R-environment

Masterclass - 26 January 2018

## Introduction

Do you also save your scripts as “v1”, “v2” and “final”? Do you have a hard time figuring out what the differences between these versions are? Maybe you are lucky, and you find your own “documentation” in the code. Maybe not, then this course is for you! The goal of this masterclass is to enable you to make your research fully reproducible.

## The Masterclass

- Version control will make you able to get rid of the “v1” and “v2” system.
- Professional documentation of R code will make you sure to quickly find your own comments.
- Working with functions and a structured project is the way to face complex issues you may find in your research.

Bring your own R-code! During our lectures and hands-on you will be able to start using all these tools.

## Subscription

The subscription is open until the 10th of January. Send an email with your name, institute and short motivation to: [marieke.dirksen@knmi.nl](mailto:marieke.dirksen@knmi.nl) or [antonello.squintu@knmi.nl](mailto:antonello.squintu@knmi.nl).

Course organisation	KNMI
Group size	min 12/max 24
Course frequency	Once
Prior knowledge	Basic R-programming
Intended credits	0.3 ECTS
Location	De Bilt, Utrechtseweg 237
Date & time	26-01-2018, 9:00 - 17:00h

Research School for  
Socio-Economic and  
Natural Sciences of  
the Environment
